## ERF2019 programme

The European Robotics Forum 2019 (ERF2019) **first version of the programme** has been released.

This unique robotics event will offer over 50 information-filled workshops with presentations by leading European experts from industry, business, and top-level academia, as well as relevant European policy makers. At the **exhibition**, sponsors and exhibitors will showcase their prototypes, products, and services, and attendees will get to know the most advanced European robotics industry, research institutes and projects.

ERF2019 is not another scientific conference but the one event where delegates can network with roboticists from over 40 countries, during the social events (Welcome Reception and euRobotics Awards Ceremony Banquet Dinner).
